Introduction

Web and Mobile Front-End Developer with hands-on experience building scalable, responsive, and production-ready applications using React.js, Next.js, and React Native. Skilled in developing modern web and cross-platform mobile applications, integrating RESTful APIs, and implementing reusable, maintainable component architectures. Experienced in performance optimization, responsive UI development, and end-to-end mobile application deployment. Strong focus on delivering seamless, user-friendly experiences across web and mobile platforms.

Education

Bachelor of Engineering – Computer Science and Engineering
Anna University, Chennai

Aug 2019 – May 2023

Nandha College of Technology GPA: 8.6/10

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, React Native

Mobile Development: React Native CLI, Android Build and Release Management, Mobile App Deployment

Backend & Database: REST APIs, Node.js, MongoDB, MySQL, Java, Spring Boot (Basic)

Core Competencies: Component-Based Architecture, Cross-Platform UI Development, API Integration, State Management, Responsive Web Design, Performance Optimization

PROFESSIONAL EXPERIENCE

Associate Developer | Revotran – Chennai (2 Years)

April 2024 – Present

Project: Oneresi (Mob Platform & Mobile App)

- Developed and delivered core features including Announcements, Meetings, Invoices, Complaints, Form Documents, and Asset Management across web and mobile platforms.
- Built responsive web applications using **React.js** and **Next.js**, along with cross-platform mobile applications using **React Native CLI**.
- Developed reusable, component-based UI architecture to improve code maintainability, scalability, and development efficiency.
- Implemented end-to-end mobile user flows for modules such as Complaints, Forms, Meetings, and Visitor Management.
- Integrated web and mobile applications with **RESTful APIs** and worked with backend services developed using **Java and Spring Boot**.
- Implemented API integration, state management, form validation, dynamic UI components, and responsive layouts across application modules.
- Optimized application performance through reusable components, efficient API handling, pagination, loading states, and UI improvements.
- Managed the **Google Play Store deployment lifecycle**, including Android build generation, testing, release preparation, and production deployment.
- Performed cross-browser testing and real-device Android testing to identify and resolve UI, functional, and compatibility issues.
- Collaborated with backend developers, QA engineers, and other team members to deliver stable, production-ready web and mobile releases.
